-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

2. In addition the status of the parent application needs updated with the current status of the application.

### *Claim Objections*

3. Claim 16 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. There are no structural limitations in claim 16 to further limit the apparatus of claim 8. Claim 16 only makes reference to the intended use of the apparatus and does not further limit the structure of claim 8.

### *Claim Rejections - 35 USC § 112*

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 9-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9-11 are vague and indefinite for double recitations of “at least one geometric figure outline” in the first two lines of each claim. This makes it unclear if these different shaped apertures (the geometric outlines) are in addition to the “at least a first geometric figure outline” which is a generic aperture of no particular shape and the “at least a second geometric figure outline” which is a circle which is set forth in claim 8 or if they are further defining the shape of the previously undefined shape of the “at least a first geometric figure outline”.

*Claim Rejections - 35 USC § 102*

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 8, 15, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacob.

The device as claimed is disclosed by Jacob with a measuring adjunct that as at least two geometric figure outlines one of which is circular with the indicia being in metric units.

*Claim Rejections - 35 USC § 103*

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacob.

The device as claimed is disclosed by Jacob as stated in the rejection recited above for claims 8, 15, and 16, but lacks the specific shapes of the apertures claimed and the particular material of the template. The various shapes claimed are all old and well known for measuring various items and Jacob discloses using various shaped apertures to measure different items. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use any old and well known shape in Jacob to measure any particularly shaped item to determine the size of the particular item. The various materials claimed are all old and well known materials used in constructing measuring devices with varying desired characteristics. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the template of Jacob of any desired old and well known material to take advantage of the well known characteristics of each particular material.

*Allowable Subject Matter*

10. Claims 1-7 and 17-20 are allowed.

11. Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
